We are writing you to tell you that we are in favor of the Groundwater Savings Project and very strongly support its implementation. We cannot understand why there is opposition from the Sun City organizations. We must take the steps necessary to ensure that water is properly managed and that continuing on the present course will hasten further subsidence. It seems the use of CAP waater should have been a mute item and settled several years ago.

Please consider our support for implementing the Groundwater Savings Project.

Martin and Arlene Wyka,
Residents in Sun City West @ 14620 Blackwood

Dr.

Subject: Groundwater Savings Project

I support the Groundwater Savings Project which proposes to use CAP water for golf course irrigation. Ground water levels continue to decline beneath our Sun Cities area, and we must address water management issues effectively ASAP.

Leone Jung
Sun City West Resident
